Professional Summary

Full-stack developer and Computer Science student at Tecnológico de Monterrey (GPA 93/100) with hands-on production experience in TypeScript, Node.js, React, and PostgreSQL. Designed and deployed an internal task management platform end-to-end as sole developer. Focused on backend architecture, relational database design, and building reliable, maintainable systems.

Work Experience

BizPro — Software Developer (Part-Time, Concurrent with Studies) Oct 2024 – Present
Monterrey, México

- Maintain and enhance existing production web and mobile applications, resolving bugs and delivering incremental feature improvements across the full stack.
- Implement new features end-to-end — from database schema changes to frontend UI — ensuring consistency and stability across the system.
- Manage and resolve development tickets efficiently, prioritizing issues by impact and coordinating fixes within production timelines.
- Optimize relational database schemas to preserve data integrity and support evolving business requirements.

Education

Tecnológico de Monterrey (ITESM) — Monterrey, México Aug 2022 – Jun 2026 (Expected)
Bachelor's in Computer Science and Technology Overall GPA: 93/100
Relevant Coursework: Data Structures and Fundamental Algorithms, Object-Oriented Programming, Computational Methods, Software and Decision Making.

Sungkyunkwan University (SKKU) — Suwon, South Korea Aug 2025 – Dec 2025
International Exchange Semester
Relevant Coursework: Systems Architecture, Advanced Databases.

Projects

Internal Task Management Platform 2025 – 2026

Node.js, Express, TypeScript, Prisma ORM, PostgreSQL, React, Docker

- Designed, built, and shipped to production a full-stack internal task management platform as sole developer, replacing the company's previous Excel-based workflow.
- Implemented role-based access control (admin / viewer) with normalized relational catalogs and UUID identifiers, separating task administrators from organization-wide consumers.
- Built REST APIs in TypeScript with structured validation and error handling, backed by a PostgreSQL schema modeled via Prisma ORM and containerized with Docker.
- Developed a responsive React dashboard supporting category filtering, deadline tracking, task descriptions, and per-task notes for operational context.

Certifications

Artificial Intelligence Fundamentals — IBM SkillsBuild Apr 2024

Technical Skills

Programming Languages: Python (3 years), C++ (2 years), JavaScript (2 years), TypeScript (2 years), Java (1.5 years)

Frameworks & Tools: Node.js, Express, React, Flask, Prisma ORM, PostgreSQL, Docker, Git, MySQL

Languages

Spanish (Native) | English (Advanced)
